CEO Commentary and Outlook

Ken Asbury, CACI's President and CEO, said, "Our fiscal third quarter results continue to affirm our long-term strategy. We delivered another strong quarter of organic revenue growth, profitability, awards and cash flow. There is momentum across the business which is delivering exceptional outcomes for our customers and gives us continued confidence in our ability to deliver on our long-term commitment to grow revenue organically and expand margins. In addition, the improving budget backdrop should enhance our ability to grow and generate shareholder value."

Revenue for the third quarter of Fiscal Year 2018 (FY18) increased compared to the third quarter of Fiscal Year 2017 (FY17), driven primarily by on-contract growth of existing work and new business wins. The higher operating income was due primarily to improved program execution, particularly on fixed price programs, one-time incentive fees and other one-time items. The increase in net income was due to the factors noted above and the impact of the passage of tax reform legislation. Cash provided by operations in the quarter was \$98.7 million.

**Reconciliation of Net Income to Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA)
(Unaudited)**

The Company views Adjusted EBITDA and Adjusted EBITDA margin, both of which are defined as non-GAAP measures, as important indicators of performance, consistent with the manner in which management measures and forecasts the Company's performance. Adjusted EBITDA is a commonly used non-GAAP measure when comparing our results with those of other companies. We define Adjusted EBITDA as GAAP net income plus net interest expense, income taxes, depreciation and amortization, and earnout adjustments. We consider Adjusted EBITDA to be a useful metric for management and investors to evaluate and compare the ongoing operating performance of our business on a consistent basis across reporting periods, as it eliminates the effect of non-cash items such as depreciation of tangible assets, amortization of intangible assets primarily recognized in business combinations, as well as the effect of earnout gains and losses, which we do not believe are indicative of our core operating performance. Adjusted EBITDA margin is adjusted EBITDA divided by revenue. These non-GAAP measures should not be considered in isolation or as a substitute for performance measures prepared in accordance with GAAP.

**Reconciliation of Net Income Excluding the Impact of Tax Reform
(Unaudited)**

The Company views Net Income excluding the impact of Tax Reform, a non-GAAP measure, as an important indicator of performance, consistent with the manner in which management measures and forecasts the Company's performance. Net Income excluding the impact of Tax Reform is defined as GAAP Net Income adjusted to exclude the impact of Tax Reform. We believe this is an important calculation to show company performance without the benefits of Tax Reform. Management is incented to perform via metrics without the impact of Tax Reform. This non-GAAP measure should not be considered in isolation or as a substitute for performance measures prepared in accordance with GAAP.
