

# CACI Debuts Two New Counter-Unmanned Aircraft System Technologies

*Visit CACI at the AUSA Annual Meeting from Oct. 11-13 to see the technology and learn more*

RESTON, Va.--(BUSINESS WIRE)-- CACI International Inc ([NYSE: CACI](#)) announced today the release of its latest technologies to mitigate threats from unmanned aircraft systems. The next generation CORIAN 2.0 system and new CORIAN Tactical system, are part of CACI's SkyTracker® Suite of counter-unmanned aircraft system (C-UAS) technology, combining the latest generation of sensors and effectors for a complete range of autonomous threat coverage. Visit CACI during the AUSA 2021 Annual Meeting and Exposition from Oct. 11-13, 2021 at the Walter E. Washington Convention Center in Washington, D.C., Hall C Booth 3525 to see the technology and learn more.

CORIAN™ 2.0, the next generation fixed-site multi-sensor platform expands on existing CORIAN technologies with improved mechanical design, capability advancements, and integration with other phenomenology. These enhancements extend the range of system effectiveness, provide the ability to guard against multiple, simultaneous threats from standoff distances and easily integrate with other systems, including command and control systems such as forward area air defense command and control (FAAD C2).

CORIAN Tactical, the new system offering both fixed and on-the-move protection against sUAS threats, secures airspace and critical infrastructure in environments ranging from dense population areas to remote locations. With a tailorable and scalable configuration, low size, weight, and power (SWaP) and precise capabilities, the ruggedized system offers expanded mission options that can be installed in less than an hour.

“Backed by the world’s largest threat signals library and over 1200 sensors globally, our experience mitigating C-UAS threats allows us to offer technology for any C-UAS challenge or mission,” said [Todd Probert](#), President of National Security and Innovative Solutions at CACI. “Our newest platforms contain the most advanced technology available in the market to detect, track and defeat emerging threats to our national security, protecting people and places in any environment.”

CACI's SkyTracker Technology Suite is a family of systems that reliably detect, track, classify and defeat Group 1-5 UAS threats. The technology portfolio enhances operational awareness across high-level UAS threat groups and within a layered defense construct across numerous environments. SkyTracker features purpose-built hardware with easily updated software to provide unique capabilities for both threat detection and precision mitigation.

## About CACI

CACI's approximately 22,000 talented employees are vigilant in providing the unique expertise and distinctive technology that address our customers' greatest enterprise and mission challenges. Our culture of good character, innovation, and excellence drives our success and earns us recognition as a *Fortune* World's Most Admired Company. As a member of the *Fortune* 500 Largest Companies, the Russell 1000 Index, and the S&P MidCap 400 Index, we consistently deliver strong shareholder value.
