

CACI Awarded \$805 Million Task Order to Provide Engineering Support and Technology to U.S. Navy's NavalX Office

RESTON, Va.--(BUSINESS WIRE)-- CACI International Inc ([NYSE: CACI](#)) announced today that it has been awarded a five-year task order valued at up to \$805 million to provide engineering support and technology to the U.S. Navy's NavalX Office under the Department of Defense Information Analysis Center's (DoD IAC) multiple-award contract (MAC) vehicle.

"As threats against our nation's security continue to grow in number and sophistication, so do the needs to address critical capability gaps, drive innovation, and solve complex problems," said [John Mengucci](#), CACI President and Chief Executive Officer. "CACI's six-plus decades of supporting Navy programs gives us the experience needed to tackle the most pressing challenges our sailors face every day by developing new technology and capabilities, and delivering them rapidly fleet-wide to increase readiness and effectiveness."

Under this task order, CACI will perform research, analysis, engineering, prototyping, and assessments to identify, develop, test, and transition modern digital tools for the Navy. CACI will also connect teams with tools, training, and resources that will deliver more indispensable solutions to the warfighter. These activities will allow NavalX to enhance operational performance through advanced technology development and seamless integration of multi-domain systems.

About the DoD IAC Program

The DoD IAC, sponsored by the Defense Technical Information Center, provides technical data management and research support for DoD and federal government users. Established in 1946, the IAC program serves the DoD science & technology (S&T) and acquisition communities to drive innovation and technological developments by enhancing collaboration through integrated scientific and technical information development and dissemination for the DoD and broader S&T community.

These DoD IAC MAC task orders (TOs) are awarded by the U.S. Air Force's 774th Enterprise Sourcing Squadron to develop and create new knowledge for the enhancement of the Defense Technical Information Center (DTIC) repository and the R&D and S&T community.
