

CACI Continues Modernization of U.S. Navy's Military Sealift Command's Integrated Business Systems

RESTON, Va.--([BUSINESS WIRE](#))--CACI International Inc ([NYSE: CACI](#)) announced today that it has been awarded a five-year technology contract valued at up to \$113 million by the U.S. Navy's Military Sealift Command (MSC) to continue modernizing a portfolio of mission-critical business applications used by both ashore personnel and MSC's global fleet.

"The Military Sealift Command plays a vital role in sustaining U.S. and allied operations around the world, and CACI is proud to continue supporting that mission," said John Mengucci, CACI President and Chief Executive Officer. "Our team is delivering secure, resilient technology that modernizes critical business systems, strengthens operational readiness, and helps MSC respond faster to operational demands. This award reinforces CACI's role as a trusted technology partner to the Department of War and our commitment to advancing the capabilities our customers depend on."

MSC operates approximately 140 civilian-crewed ships that replenish Navy ships, conduct specialized missions, strategically preposition combat cargo at sea around the world and move military cargo and supplies used by deployed U.S. forces and coalition partners.

Under this contract, CACI delivers program management, engineering, software development, cloud and cybersecurity capabilities, ensuring resilient, secure, and scalable technology for MSC's government-owned vessels and associated command sites. By integrating artificial intelligence, advanced analytics, and intelligent automation across ashore and afloat environments, CACI is streamlining operations, reducing downtime, and delivering faster, data-driven decision support that enhances readiness for MSC's worldwide fleet.

About CACI
